

TILP Ask the Experts Session

How to Master .NET Localization

Florian Sachse, Managing Director of PASS Engineering

In this workshop you will learn about .NET concepts related to localisation. The workshop consists of presentations and exercises. We therefore strongly recommend bringing your laptop with you to the session. Exercises will be prepared by the presenter; however, participants are also invited to contribute their own example data and files.

As a participant at this session, you will take with you the PowerPoint presentation used during the workshop, both source and binary sample files, and a tool to inspect .NET applications. This tool allows you to identify .NET related localisation problems and to evaluate localisation tools which you consider using in your localisation process.

On behalf of TILP, Florian Sachse will address a selected set of topics relevant to .NET Localization, among them:

- .NET Basic Concepts
- Frameworks
- Satellite Assemblies
- References
- Inheritance
- Reflection
- Font Issues
- Obfuscation
- Signing

At the end of the workshop, participants will have gained a thorough understanding of .NET concepts related to Localisation.

- Set-up of a .NET localization kit
- Validation of the target files generated
- Evaluation of localisation tools

The session will be highly interactive and hands-on. In addition to material being presented, participants will be able to 'learn by doing'. The session will include recent case studies prepared by the presenters. In addition, participants are highly encouraged to contribute their own case studies and their own professional experience in consultation with the session presenter.

Agenda

Start: 14:00

Finish: 18:00

14:00 REGISTRATION

Welcome

14:15 .NET Basic Concepts

16:00 BREAK
16:15 .NET Advanced Concepts
18:00 End

Who should attend

Ask the Expert Sessions are aimed at localisation managers, engineers and linguists directly involved in the production of localised products and services. The ability to actively participate in and contribute to the discussions is a pre-requisite.

About Florian Sachse

Florian Sachse is Managing Director of PASS Engineering GmbH, a company providing software localisation solutions. In addition to many other areas of responsibilities, Florian Sachse is also responsible for .NET development and .NET localisation. PASS Engineering is one of the long-term sponsors of TILP. Florian Sachse is a Council Member and a Professional Member of The Institute of Localisation Professionals, TILP.

About the Ask the Expert Sessions

The sessions are organised for The Institute of Localisation Professionals (TILP) by members for members. All presenters are professional members of the Institute and all participants are required to be TILP members. Membership is open to individuals and can be applied for online at www.tilponline.org.

About TILP

TILP was formally registered as a non-profit organization "to develop professional practices in localisation globally" on July 30, 2002. TILP sponsors include Microsoft, Lionbridge, Oracle, Alchemy Software Development, Symantec and Novell. In short order, TILP has developed strong industry partnerships and offers a range of membership services. For more information email info@tilponline.org or visit www.tilponline.org.
